Education

University of Massachusetts, Amherst, BS in Mathematics

Sept 2024 – May 2028

University of Massachusetts, Amherst, BS in Physics

- **AS and A levels:** Pure Mathematics 1 and 3, Physics, Chemistry, Business, Statistics 5 and 6

Relevant Coursework

Calculus (I, II, III), Linear Algebra, Differential Equations, Statistics, Coding Arduino, Physics I-III with Labs, Differential Geometry

Experience

TSS Student Technician, Isenberg School of Management

January 2025- Present

- Provide front-line technical support for faculty, staff, and students, troubleshooting hardware, software, networking, and Microsoft 365 issues.
- Image and configure laptops for deployment, preparing devices for use across the Isenberg School of Management
- Install and terminate Cat6 Ethernet cabling with RJ45 connectors and assist with RS-232 serial connections and signal wiring
- Assist with installation and reconfiguration of classroom AV systems, including AV rack connections, signal routing, and cable management
- Troubleshoot and resolve recurring issues involving Toshiba printers, Microsoft 365, classroom technology, and other end-user systems

Head of Editorial, Young Scientists Journal

November 2022 – Present

- Led a global editorial team of 120 members, overseeing the publication process and maintaining the journal's article database
- Coordinated directly with authors to resolve submission issues, provide updates, and ensure timely communication
- Streamlined editorial workflows, improving efficiency in article tracking and review processes
- Guided and supported team members in editorial responsibilities, improving collaboration across diverse contributors

Projects

The Differential Geometry of DNA: From Helices to Supercoiling | MapleStack Studio

- Honors Differential Geometry Paper & Presentation (Spring 2026)

Personal Website

MapleStack Studio

- Designed and developed a personal portfolio website using HTML and CSS, hosted on GitHub Pages, to document technical projects and learning progress.

Arduino coursework Project

- Sound Level Monitoring System: Arduino Project Designed and implemented an Arduino-based sound-level monitoring system to collect real-time environmental noise data. Processed and visualized sensor data using Python and Plotly to analyze temporal noise patterns.

Technologies

Languages: Bash, HTML/CSS, Python, Java

Software and Technologies: Linux, Github, LaTeX, CAD, PCB/KiCad, WordPress

Platforms: One Drive Management tools, Microsoft 365
